Survey Station with Level	△10.000

90.50 — Terrain contours shown at 0.50m intervals

Hawthorn hedge row width drawn approximately

Survey notes:

1. Survey orientated to Ordnance Survey National Grid by the use of GPS coordinates transformed using 'UK/OSGB 1936/British National Grid OSTN02'. Scale factor of 0.999601271698 applied to all calculations.

2. Level datum taken GPS observations and transformed using 'The National Geoid Model OSGM02'

3. All feature shown were current at the time of the survey. There may be features missed during the survey due to obstructions or lack of access.

4. Drainage: invert levels, pipe sizes and pipe connections have been surveyed by visual inspection only, and therefore the complete accuracy of this information cannot be guaranteed.

5. Trees: sizes and species are indicative only, with the mean spread drawn to scale.

6. The contractor is to check and verify all building and site dimensions, levels and sewer invert levels at connection points before work starts.
